

2012 Edward Byrne Memorial Justice Assistance Grant (JAG)

State Program Solicitation

I. INTRODUCTION

The Edward Byrne Memorial Justice Assistance Grant (“JAG”) Program is the primary provider of federal criminal justice funding to state and local jurisdictions. JAG funds support all components of the criminal justice system, from multijurisdictional drug and gang task forces to crime prevention and domestic violence programs, courts, corrections, treatment, and justice information sharing initiatives. JAG funded projects may address crime through the provision of services directly to individuals and/or communities and by improving the effectiveness and efficiency of criminal justice systems, processes, and procedures.

Established to streamline justice funding and grant administration, the JAG Program allows states, tribes, and local governments to support a broad range of activities to prevent and control crime based on their own local needs and conditions. JAG blends the previous Byrne Formula and Local Law Enforcement Block Grant (“LLEBG”) Programs to provide agencies with the flexibility to prioritize and place justice funds where they are needed most.

II. PURPOSE OF THE GRANT

The JAG Program is funding to assist state and units of local government in developing and implementing activities and technologies/equipment to prevent and control crime and to improve the criminal justice system in order to have a lasting impact on the state of Indiana.

Purpose Areas

JAG funds may be used for state and local initiatives, technical assistance, training, personnel, equipment, supplies, contractual support, and information systems for criminal justice, as well as criminal justice-related research and evaluation activities that will improve or enhance:

- A. Law enforcement programs.
- B. Prosecution and court programs.
- C. Prevention and education programs.
- D. Corrections and community corrections programs.
- E. Drug treatment and enforcement programs.
- F. Planning, evaluation, and technology improvement programs.
- G. Crime victim and witness programs (other than compensation).

ICJI STATE Priority Funding Areas

1. **Multi-jurisdictional Task Forces and Interdiction Teams** with a collaborative and comprehensive strategy that includes: undercover investigation, direction and control of confidential informants, interdiction efforts, and prosecutorial support. Task forces and Teams are required to include at least three jurisdictions within at least two counties.
2. **Re-entry and sentencing policy reform** implementation and initiatives for offenders returning from prison to local communities
3. Technology projects which will enhance **state-wide criminal justice information sharing** efforts and advance the state's data exchange in alignment with the National Information Exchange Model (NIEM 2.0)

*** Additional points will be awarded to proposals that specifically comply with a priority funding area.**

III. ELIGIBILITY REQUIREMENTS

State agencies, units of local government, and units of tribal governments are eligible to apply for JAG program funds. A local unit of government is defined as: a city, county, town, township, or other general purpose political subdivision of a state; any law enforcement district or judicial enforcement district that is established under applicable state law and has authority to, in a manner independent of other state entities, establish a budget and impose taxes; and includes Indian tribes which perform law enforcement functions as determined by the Secretary of the Interior. A city or county jurisdiction must be the legal applicant and recipient on behalf of city and county departments.

Please note that all Applicant Agencies who receive current funding from any Division of the Indiana Criminal Justice Institute **must** be current on all reports related to such funding. Delinquent reports will disqualify an Applicant Agency from consideration for funding through any grant program through the Indiana Criminal Justice.

A DUNS number is required. All applicants under this solicitation must include a Data Universal Numbering System (“DUNS”) number in their application. Applications without a DUNS number are incomplete.

A DUNS number is a unique nine-digit sequence recognized as the universal standard for identifying and keeping track of entities receiving Federal funds and to validate address and point of contact information for federal assistance applicants. Obtaining a DUNS number is a free, simple, one-time activity. Obtain one by calling 1-866-705-5711 or by applying online at <http://fedgov.dnb.com/webform/displayHomePage.do>.

Central Contractor Registration (“CCR”) is required. In addition to the DUNS number requirement, OJP now requires that all applicants for federal financial assistance maintain current registrations in the CCR database. **This includes all subgrantees of the Indiana Criminal Justice Institute.** The CCR database is the repository for standard information about federal financial assistance applicants, recipients, and sub-recipients. Organizations that have previously submitted applications via Grants.gov are already registered with CCR, as it is a requirement for Grants.gov registration. Please note, however, that applicants must update or renew their CCR registration at least once per year to maintain an active status. Information about registration procedures can be accessed at www.ccr.gov. For assistance with CCR, please contact the CCR Help Desk or the Drug & Crime Control Division.

Evidence-based Programs

The Indiana Criminal Justice Institute is committed to the collection and analysis of sound and relevant criminal justice data. State funding priorities must be directed at successful programs and those utilizing evidence-based practices in the criminal justice community. It is important to move toward evidence-based programs within the criminal justice community and focus funding on programs that work and produce results.

Evidence-based programming is the use of research and proactive efforts to implement procedural guidelines across agencies, units, victims, and officers, and to evaluate ongoing policies and operations within law enforcement agencies. When evaluating programs, two types of research are used: information regarding what works best when implemented properly and what was achieved. Agencies can then use the research to implement policies that are most effective and to evaluate their practices. Examples of evidence-based programs include, but are not limited to the following:

- Courts: Problem-Solving Courts
- Policing: Directed patrols, proactive policing, place-based policing
- Corrections: Assessing offender risk/need levels with actuarial instruments, engaging offenders in pro-social interactions inside the prison and in the community, programs that enhance offenders’ skills (i.e., vocational training, education, social skills, thinking errors)

***All programs applying for JAG funds must be evidence-based or modeled from evidence-based programs which have displayed effectiveness. Applications should include a brief description of the evidence-based practices, either through current program activities or research from similar programs, which support the program’s activities. This explanation should be included within the “Needs Assessment” portion of the application.**
